

## ALUMINIUM METAL POWDER, GRANULES, SHOTS

We have state of art of manufacturing facility to match international standard of aluminium powder, granule, shots with high purity primary and secondary Aluminium ingots, scrap as per customer requirement for Ferro alloys, De-oxidizer, Thermite welding, foundry fluxes, welding electrodes, alumino thermite, refractory bricks, ordnance, Diamond tools, Brake lining and many applications.

ALUMINIUM POWDER (TAJ-ALP)

GRADE	SIZE(MM)	PURITY	APPLICATION
TAJ-ALP(45 $\mu$ -01)	45 $\mu$ -0.10	97-99.5%	Exothermic process, thermite welding, Ferro alloys, foundry flux, De-oxidizer (Ferro Mo, Ferro Mn, Ferro Cr)
TAJ-ALP(01-1)	0.10-1MM	97-99%	Exothermic process, Ferro alloys, Thermite process, De-oxidizer
TAJ-ALP(02-2)	0.20-2MM	97-99%	

ALUMINIUM GRANULE (TAJ-ALG)

TAJ-ALG(02-5)	0.2-5MM	97-99%	Ferro alloys, Exothermic process, De-oxidizer
TAJ-ALG(2-5)	2-5MM	97-99%	De oxidizer (Ferro V), Ferro alloys

ALUMINIUM SHOTS (TAJ-ALS)

TAJ-ALS(5-10)	5-10MM	95-99.7%	De-oxidizer in steel, Chemistry, Water purification
